Perrysville Park was once the playground for Perrysville Elementary School. Once the schools consolidated in the early 1990's, the playground area was saved as greenspace and became part of the county park system.

The park offers a variety of activities. On many a nice day there can be found ball teams practicing or tournaments happening.

The entire park can be seen from all parts of the walking path providing a sense of security for parents and a bit of independence, while still in sight, for children.
