RECOVERY TIE DRAWING

1, page 426 of the above records indicates that a stone was set at the intersection of the Indiana-Illinois line and the north line of section 31-18-10 to the north. This is now a built up asphalt road surface and did not dig it up. We found a large nail with the number 30 stamped on the head at this apparent location. We measured from this nail to point A and projected a dimension along this line to set point B. This point well within an existing old fence running easterly from that point.

Original government field notes indicated that the east quarter corner of section 31-18-10 was set 330' north of a branch. We found the intersection of the south and an east-west fence at a point 291' north of a branch in same location. We accepted this as the east quarter-corner of Section 31-18-10 and drove an iron pipe there.
