The Vermillion County Monument (steel disk in concrete labeled 'VCS') was set in place of a stone found. The stone was found 1.3 feet northeast of the base of a steel corner post. As found, the post was bent and broken off. The stone is in-line with a tree line to the east and south. This stone is shown as marking the corner on several previous surveys, including a survey by James C. Tibbett recorded in Survey Record 1, page 305 and a survey by Gregory D. Williams recorded as Instrument 2018001231, all in the Office of the Vermillion County Recorder. The stone fits well with evidence of occupation to the east and south and fits well with the relative locations of proximate corners. The stone was accepted as the best available evidence of the corner. The stone was removed and replaced with the 'VCS' monument on August 21, 2025
