CORNER WITNESS DETAIL

SCALE 1" = 80' 

A - Vermillion County witness mark, flush, 218.9'

B - Vermillion County witness mark, flush, 364.7'

C - Wood corner post, flush, 234.8'

Vermillion County witness mark is a 3/8" diameter x 2' long rebar bearing a metal cap stamped "Vermillion County Witness Point."

The rebar with Vermillion County cap was set at a computed position based on a survey by William J. Hudson recorded as Instrument 2000-00992 in the Office of the Vermillion County Recorder. The Hudson survey states that a rebar was set at this corner, but that monument has been destroyed, presumably by agricultural equipment. The current monument was set at 16 inches deep to avoid disturbance. An uncertainty of approximately 0.5 foot in all directions should be attributed to the position of this corner based on the relative positions of other monuments found and shown on the Hudson survey and the geometry indicated by that survey. The rebar was set on April 10th, 2024.
